TESTIMONIALS

Just want to let you know that your driver George was wonderful. Besides being a good driver, he was very careful putting me into the van and again taking me out of it.

The wheelchair used belonged to Hospital; so I had to transfer from it when I reached my nursing home. I was in a hospital gown. He was so helpful getting me out of the wheelchair and so concerned about my modesty and dignity with the open gown, I can't thank him enough for all the care and consideration he gave me.

Sincerely,

Mary A. Jones
Chalfont, PA

I just wanted to thank you for the excellent service ROMED ambulance has provided to Montgomery Hospital over the past years.

Your crews are always prompt and professional. If Montgomery Hospital needs a special service ROMED ambulance is always willing to assist us in any way they can.

Again, thank you, and Montgomery Hospital will continue their relationship with ROMED for years to come.

Sincerely,

Bonnie Jean Koresko, RN, BSN, CCM, CMAc
Case Management Supervisor

On April 13, 2006, we had the opportunity to use your ground transportation services in the transfer of a patient from Philadelphia International Airport to the University of Pennsylvania Hospital.

I would like to express my sincere appreciation to the dispatchers, especially Alex, as well as the transport personnel, for the exceptional services and courtesies that were extended to our aeromedical staff both prior to and during the transfer of this patient.

Sincerely,

Craig W. Poliner
President

GENERAL INFORMATION ABOUT US

Establishment

Romed Ambulance is a privately owned ambulance service, established in 2001 for the purpose of providing quality ambulance transportation services in the Delaware Valley. The company is licensed by both Pennsylvania and the New Jersey Department of Health. The company is a participating provider for Medicare, PA and NJ Medicaid, and works with all local HMO's, Workman's Comp., and other insurance companies.

Technologically Advanced

Romed Ambulance uses only the newest and best equipment available to insure patients comfort and safety during transport. Each of the vehicles is equipped with GPS AVL (Automatic Vehicle Locator) which provides the dispatcher with live location of each vehicle. This allows the dispatchers to send the closest crew to the call, as well as monitor vehicles route, speed and safety. The crews are dispatched via electronic text to eliminate errors associated with verbal radio communications.

Highest Standards

Our staff is held to the highest standards in professionalism and training. We emphasize continual education and constant advancement in professional knowledge and skills, as well as participate in MCI (mass casualty incident) and terrorism drills in our region.
